

The Effects of Aqueous Ozone on Bacteria & Viruses

Aqueous Ozone: The Better Way to Clean and Sanitize

WHAT IS AQUEOUS OZONE?

Aqueous ozone (AO) is a product of nature that is produced when regular water and air become electrically charged. This electrical charge creates one of the most powerful oxidizers on the planet that revolutionizes the way people clean, sanitize and deodorize spaces. When produced by either nature or a device, like EnozoPRO, AO is a less toxic alternative to commercial cleaners that contains no harsh chemicals or additives – causing fewer illnesses and allergic reactions on the job.

MICROORGANISM	CONTACT TIME	REDUCTION
E. Coli	30 Seconds	99.9%
Staph A.	30 Seconds	99.9%
MRSA	30 Seconds	99.9%
Salmonella	30 Seconds	99.9%
Pseudomonas A.	30 Seconds	99.9%
Listeria	30 Seconds	99.9%
Enterococcus faecium	30 Seconds	99.9%
Klebsiella pneumoniae	30 Seconds	99.9%
Enterobacter aerogenes	30 Seconds	99.9%
Bordetella Bronchoseptica	2 minutes	99.9%
Clostridium Difficile	2 minutes	99.9%
Fusarium Solani	30 Seconds	99.9%

WHY AQUEOUS OZONE IS BETTER

- Up to 5,000 refills using one bottle of EnozoPRO
- Doesn't leave behind any harmful residues or bi-products
- Reduces skin, breathing and eye issues as opposed to other cleaners
- Uses regular tap water – no additional chemicals, perfumes or dyes
- Inhibits the growth of microbes in just 30 seconds

Save time, save money and improve workplace health using aqueous ozone

AQUEOUS OZONE IS CAPABLE OF KILLING 99.9% OF THE MOST HARMFUL BACTERIA:

- E. Coli
- Salmonella
- Listeria
- Pseudomonas aeruginosa
- Bordetella bronchiseptica
- Legionella
- MRSA
- Klebsilla pneumoniae
